THUBSDAY, APRIL 14, 1865.

FOR MAYOR:

FLAVIUS O. BEAL. Young America and his older brother

having opened. An exchange remarks that if the Democrats will only turn Cleveland loose in the close states this fall the Republicans will win hands down. Judging from a milar remarks dropped in Washington evidence is not lacking that a good many Demo-

crats to-day regard the ex-President as

something of a Jonah. The New York World is mad clear It volunteered to run the campaign for the Rhode Island Democrats, and spent its money freely for that pur-pose, but its efforts to secure an indorsement for the free trade and free columner party were a most dismal failure. In its rage the World blurts out the truth in the following sentence: "The Democrats cannot with any show of reason count upon the electoral vote of Rhode Island." There are other Democratic organs that might profitably follow the example of the World, instead of keeping up the silly nonsense about carrying the State this fail. Intidentally the World pays its respects to the Mugwumps and Mr. Cleveland, delaring that reliance can only be placed upon Democrats for Democratle victory.

It looks very much as though Mr. Bass was easting an anchor to windward. The commercial published last evening what in which we find the following sentence: The opinion is now freely expressed at the capitol that Mr. Hill's name will not go before the convention, and there are but very few Democrats who believe he can get the nomination if it does." Had this matter come as regular telegraphic news it might be without significance, but as it was elipped from some other paper its publication in the Commercial wus purely optional with the manager, hence it suggests that Mr. Bass has decided that he cannot make anything by keeping up date. They fully realize that there rests the Hill boom. As a "lightning change artist" the proprietor of the Commercial seems to have beaten the record.

We notice that the Commercial Lublishes a letter from Mr. J. W. McClure, who, in declining the position of Park Comm'ssioner, says that he takes this step to relieve him from embarrassment, as he proposes to vote for the Democratic candidate for Mayor. Of course he has a right to decide this question for himself, but the effect of this independent voting is harmful. Mr. Beal is the regular nominee of the party. He was nominated by Republicans in a very large caucus, an that nomination was made unanimous. The name of another candidate was presented, and he received a very complimentary vote, but Mr. Beal was the majority candidate. Now it is a well recognized fact that majority rule is one of the fundamental principles of the Republican party, and we therefore submit that Mr. Beal is entitled to the support of the Republiparty. Had Mr. Beal been defeated in the caucus, the supporters of the successful candidate would have insisted that he and his friends were in duty bound to accept the decision of the voters, and the rale necessarily holds good to-day.

The Democrats and the Farmers. Lo: these many years the 'Protection-ists have promised the farmer to do some-thing for him. The passage of the bill through the House to put bagging and cotton ties on the free list will give the Republican Senate and President a chance to redeem their promises. Of course, they will jump at the opportunity offered them.—Hangor Commercial.

What a tremendous boon free cotton ties and bagging would be to the farmers of Maine, for instance. But let us see what the McKinley bill has done for this industry. Prior to the passage of that bill we had not for many years past made to exceed two per cent. of the ties in ase in this country. The importation of cotton ties increased from 15,641 tons in 1884 to 30,305 in 1888. The duty was increased under the new law and the effect was to revive operations in the old mails and to establish new plants. The resul. of this has been to decrease the importation from 29,868,048 pounds of the value of 8456,981.67, to 1,522,113 pounds of the value of \$23.984. This means that the American mills and American labor have supplied the ties. But this is not all. From the price list furnished by the Bristol Aills Company it appears that in August the price was \$1.20; in September \$1.15: in November 81.12; in December 41.10: In

January of this year \$1.071/2. This is what competition stimulates by the tariff has done. Now what will happen if the duty is removed? The Democratic Congressman for New Jersey furnished the answer to this question, at far as bagging is concerned, in the House last week. The foreign trust which controls the raw material, would flood our market until the American mills, which have reduced the price of gunny cloth from thirty-five cents in 1866 to six and a quarter cents for a better article to-day, are forced out of business, and then up would ge the price to suit the trust. This is Democratic

With what great degree of gratitude the farmers will look to this Democ atle House which has just voted to strike the duty from wool. Why, in 1883, when the wool tariff was revised, the Despot atto party in the State of Ohlo issued sprecia-mation to the people under the cap-lon, "Importance of the Wool-growing Indus-try in Ohio," in which they sale. The Democratic party, as the facts show, inve been steadily and earnestly opposed to this great wrong against the people. The onment, to a great extent, of abeepraising must inevitably follow, is the perus course designed by the Republicans is carried out." Now he cane party, which said that a reduction of the duty would be disastrous to the farmers. proposes to remove the duty a ten ther and place the farmers in unrestricted sompetion with foreign wool.

Chairman Holman has been a disappointment even to the men who were responsible for placing him where he is. He is old and feeble and even more dogmatic and unreasonable than ever; in fact, it is said that some of his Democratic colleagues of the Appropriation Comm the find it extremely difficult to work a harmony with him. Not only is the work of the committee in a backwoods state, but the bills which have been reported are in such shape as to provoke sharp opposition in the House and insure a stubborn conflict between that body and the Senate.

Another matter which is giving Speaker purported to be a Washington despatch Crisp and his lieutenants much concern is the inattention and indifference of Democratic representatives. The House went into Committee of the Whole on the navai apprepriation bill, the pending question being the print of order raised against the clause appropriating \$250,000 towards the construction of a dry dock at Algiers, La.

The point of order was statained and the item was stricken out of the bill.
On motion of Mr. Herbert, of Alabams, an amendment was adopted changing the title "Bureau of Provisions at d Clothing" to "Bureau of Supplies and Accounts."

There was no obstruction to the easy progress of the bill until the item for increase of the navy was reached.

Then Mr. Holman, of I idinan, rulsed a point of order against the clause authorizing the President to have constructed, by contract, one armored crulser of about \$,000 tons displacement of the general type of the "New York" to cost, exclusive of armament, not more than \$3,500,000.

Mr. Boutelle and Mr. Dingley, of Maine, and Mr. Herbert, of Alabama argued that the point was not well taken, and cited decisions made by Spieaker Carlisle, and by Chairmen Cox, McCreary, Wellborn, and Butterworth on the same point, in which they held that such a point could not be sustained. It had been held, they contended, for twelve years that a proposition to increase the navy was in continuation of existing work, and therefore in order. CREATE AT HEAVISION THE CONTROL OF T
